DECEMBER 8th, 2026

3RD TAX TRANSPARENCY CONFERENCE - Transparency in Times of AI

A joint event by NHH Norwegian School of Economics and NoCeT

at NHH Connect (Strømgaten 4, Bergen, Norway)

The 3rd Tax & Transparency Conference brings together academics, regulators and practitioners in the fields of tax compliance and anti-money laundering. Information exchange between tax authorities, financial institutions and supervisors has expanded considerably. As tax compliance and AML challenges grow more complex and evolve faster than ever, the critical question becomes: how can we harness AI systems while preventing or minimizing their downsides?

The keynote address will be delivered by Reinhard Biebel, Head of Corporate Tax Transparency and Administrative Cooperation at the European Commission.
Two panels then address tax transparency and anti-money laundering. Panelists from tax administrations, international organizations, the financial sector, law enforcement and academia will examine the opportunities AI offers for compliance work, the new risks it introduces, and the safeguards needed to govern its use.

Program

09:15 - 09:45 **Coffee and Registration**
